

LASERSYSTEM HD-10 Easy Touch

till 22" rims

✚ ... for 4-wheel alignment – one man operating – no external supply

✚ all measurement within 10 minutes including set-up time

✚ easy and quick measurement of:

- camber
- castor
- KPI
- turning radius
- central position of steering wheel
- rear axle offset

✚ lifting of the vehicle is not necessary – axle in driving condition

✚ run – out compensation on request

✚ HD-10 Easy Touch is featured with the new Inclinometer – digital electronic protractor – for the measurement of camber, castor and KPI

✚ 360° turnable laser head

✚ the floor and the lifting platforms have not to be 100 % horizontal

✚ the very good price-performance ratio assures a quick amortization
