# KOCH WHEEL ALIGNMENT

Laser measuring system HD-30 EasyTouch

- for all kind of vehicles -

Inclinometer

Swivel-mounted measuring arms

Adjustable measuring sensors

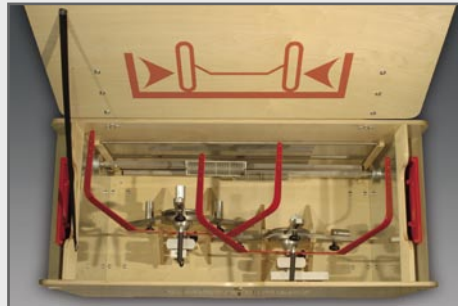

## Laser measuring system HD-30 EasyTouch

- Lifting of the vehicle is not necessary - axle in driving condition
- Easy mounting by use of new designed measuring heads - all kind of rims
- **It is especially suitable for vehicles with more than two axles**
- HD-30 EasyTouch is featured with the new inclinometer (digital electronic protractor) for the measurement of camber, castor & KPI
- 360° turnable laser head with battery
- Easy use and quick measurement of: **single toe, camber, castor, KPI, inclination of axles, center position of steering gear**
- Run-out compensation on request
- All front wheel measurements within 10 minutes including set-up time
- The very good price-performance ratio assures a quick amortisation

CD "measuring records"

Storage box on wheels

wheel plates, turning radius scales

### Additional supply:
